

# Business Model Canvas

<h3>Key Partnerships</h3> <p>- <b>IoT Device Manufacturers:</b> For water leakage sensors and integration. <b>Telecom Companies:</b> For reliable SMS gateway services. <b>Municipalities/Water Boards:</b> For public water systems and user onboarding. <b>Plumbing and Maintenance Services:</b> For quick response to alerts. <b>Cloud Service Providers:</b> For data storage and alert processing. <b>Software Development Firms:</b> For additional tech support.</p>		<h3>Key Activities</h3> <p>- <b>Application Development:</b> Build the SMS platform and ensure it integrates well with IoT sensors. <b>Testing and Maintenance:</b> Regularly test systems and perform updates. Data Integration: Process sensor data to send accurate alerts. <b>Customer Support:</b> Provide 24/7 support for technical and service-related queries. <b>Marketing and Awareness Campaigns:</b> Promote the service to municipalities, societies, and individuals.</p>		<h3>Value Propositions</h3> <p>- <b>Real-Time Alerts:</b> Notify users instantly when a leak is detected. <b>Location-Specific Information:</b> Pinpoint the exact location of the issue. <b>Cost Savings:</b> Prevent water wastage and reduce repair costs. <b>Ease of Use:</b> Accessible through SMS, eliminating the need for smartphones. <b>Scalability:</b> Compatible with individual homes, societies, and industries. <b>Eco-Friendly Solution:</b> Promotes water conservation and sustainable practices.</p>		<h3>Customer Relationships</h3> <p>- <b>Proactive Communication:</b> Send timely and accurate SMS alerts. <b>User Feedback Mechanism:</b> Collect feedback to improve services. <b>Dedicated Support Channels:</b> Offer round-the-clock support through SMS, calls, or emails. <b>Loyalty Programs:</b> Reward customers for reducing water wastage or renewing subscriptions</p>		<h3>Customer Segments</h3> <p>- <b>Primary Customers:</b> •Municipal corporations •Residential housing societies. •Industrial complexes. <b>Secondary Customers:</b> •Individual homeowners. •Property management companies.</p> <p>- <b>Primary Customers:</b> •Municipal corporations •Residential housing societies. •Industrial complexes..... <b>Secondary Customers:</b> •Individual homeowners. •Property management companies.</p> <p>- <b>Primary Customers:</b> •Municipal corporations •Residential housing societies. •Industrial complexes issue <b>Secondary Customers:</b> •Individual homeowners. •Property management companies.</p>	
<h3>Key Resources</h3> <p>- <b>SMS Gateway:</b> Reliable platform for sending and receiving alerts. <b>IoT Sensors:</b> Hardware for detecting water leaks. <b>Cloud Infrastructure:</b> Servers to process and store sensor data. <b>Development Team:</b> Programmers, designers, and testers. <b>Customer Support Team:</b> For handling user queries and feedback.</p>						<h3>Channels</h3> <p>- <b>SMS:</b> Primary method for alerting users. <b>Mobile App (Optional):</b> For advanced features like alert history and analytics. <b>Website:</b> For information, onboarding, and customer support. <b>Partnerships:</b> Use municipal corporations and IoT vendors to promote the service.</p>			
<h3>Cost Structure</h3> <p>- <b>Development Costs:</b> Initial setup for app and SMS integration. <b>IoT Sensor Costs:</b> Partnering with manufacturers or bulk purchasing. <b>marketing costs:</b>Campaigns to promote the service. <b>Operational Costs:</b> SMS charges, cloud hosting, and server maintenance. <b>Support Costs:</b> Salary for customer service staff and technical teams</p>					<h3>Revenue Streams</h3> <p>- <b>Subscription Model:</b> Monthly or yearly fees for SMS alerts.<b>Per-Alert Charges:</b> Pay-as-you-go model for occasional users.<b>Partnership Revenue:</b> Collaborations with municipalities or IoT vendors.<b>Advanced Analytics:</b> Charge premium fees for additional insights via an app.<b>White-Label Solutions:</b> Sell the system to other companies for their use.</p>
